SUBJECT INDEX

Aging
instability and relaxation of electrodeposited $Ni_{75}P_{25}$ amorphous alloys: experimental aspects quantitative theoretical predictions of isothermal and anisothermal aging using the Cunat non-linear relaxation distribution model, 359
theoretical analysis of stress relaxation measurements by bend tests for $(Fe_{50}Ni_{50})_{1-x}B_x$ glasses: alloying effects on aging, 347
Aluminium
dynamical properties of high pressure quenched f.c.c. Al–Si solid solutions, 223
formation by ion mixing of AlMn thin films in amorphous and quasi-crystalline phases: comparison of their electronic structure as determined by optical measurements, 429
magnetic properties of quasi-crystalline, amorphous and crystalline AlMn(Si) alloys, 565
metastable phase formation with dendrite growth during laser induced rapid solidification of $Al_{59}Ge_{41}$ sputtered thin films, 209
morphology of icosahedral Al–Fe phase produced by ion beam mixing, 445
quasi-crystalline and amorphous phases as products of the rapid solidification of $Al_{80-x}Mn_{20}Si_x$ alloys, 421
stability and thermodynamics of the icosahedral phase in rapidly solidified Al–Mn alloys ([Mn] = 6.20 at.%), 411
thermal stability and phason strain relaxation in Al–Mn quasi-crystals, 437
thermal stability of a supersaturated solution of hafnium in aluminium, 487
Amorphization
amorphization mechanisms in ion implanted metal films and single crystals, 89
amorphization reactions in niobium-based alloys, 105
ball milling amorphization mechanism of Ni–Zr alloys, 251
investigation on the amorphization of Zr–Pd alloys by ball milling, 271
solid state amorphization reaction of Ni–Zr multilayers after irradiation with 30 MeV sulphur ions at low temperature, 115
Amorphous alloys
effect of metalloids on the passivity of amorphous Fe–Cr alloys, 581
effect of structural relaxation on the thermodynamic properties of amorphous superconducting ZrCu alloys, 367
formation and crystallization of amorphous Ni–Ti powders prepared by mechanical alloying, 301
formation by ion mixing of AlMn thin films in amorphous and quasi-crystalline phases: comparison of their electronic structure as determined by optical measurements, 429
influence of the annealing atmosphere on the chemical and thermal stability of amorphous WSi_2, 197
instability and relaxation of electrodeposited $Ni_{75}P_{25}$ amorphous alloys: experimental aspects quantitative theoretical predictions of isothermal and anisothermal aging using the Cunat non-linear relaxation distribution model, 359
interplay of the atomic and electronic structure in liquid and amorphous metals and alloys, 531
ion beam mixing of amorphous chromium nitride/molybdenum nitride and polycrystalline Cr/Mo bilayers, 505
kinetic analysis of structural relaxation of Fe–Ni based amorphous alloys by means of DSC and electrical resistivity measurements, 375

© Elsevier Sequoia/Printed in The Netherlands

magnetic properties of quasi-crystalline, amorphous and crystalline AlMn(Si) alloys, 565
on the composition range of amorphous binary transition metal alloys, 1
on the penetration and solution of hydrogen in amorphous $Pd_{80}Ge_{20}$ and $Pd_{80}Si_{20}$ before and after crystallization, 383
preparation and magnetic studies in amorphous Tb_x–Fe_{1-x}/Al_2O_3 multilayers, 613
structural relaxation in some amorphous alloys, 339
the microstructure of amorphous and microcrystalline electrodeposited Ni–P alloys, 573
thermal stability of amorphous Ta–Ir between Y–Ba–Cu–O and silicon, 217
Amorphous films
desorption of argon from amorphous $Cu_{60}Zr_{40}$ films during crystallization, 189
Amorphous phases
application of the calphad method for the prediction of amorphous phase formation, 19
quasi-crystalline and amorphous phases as products of the rapid solidification of $Al_{80-x}Mn_{20}Si_x$ alloys, 421
structural relationships between the quasi-crystalline and the amorphous state in alloys, 395
Antimony
enhanced equilibrium concentration of donors in antimony-, arsenic- or phosphorus-doped silicon on sapphire, 39
Arsenic
enhanced equilibrium concentration of donors in antimony-, arsenic- or phosphorus-doped silicon on sapphire, 39
laser quenching of Si–As alloy, 175

Ball milling
ball milling amorphization mechanism of Ni–Zr alloys, 251
investigation on the amorphization of Zr–Pd alloys by ball milling, 271
Bismuth
structure and magnetism of metastable Bi–Fe alloy films, 621
Boron
factors influencing heterogeneous nucleation in an Ni–Si–B glass, 167
structure of TiB_2 produced by dynamic ion mixing, 477
theoretical analysis of stress relaxation measurements by bend tests for $(Fe_{50}Ni_{50})_{1-x}B_x$ glasses: alloying effects on aging, 347

Calorimetry
the process of spontaneous vitrification evaluated by calorimetry, 81
CALPHAD method
application of the CALPHAD method for the prediction of amorphous phase formation, 19
Cascade effect
cascade effect on relative stability of ordered phases in Ni_4Mo under irradiation, 465
Chromium
effect of metalloids on the passivity of amorphous Fe–Cr alloys, 581
ion beam mixing of amorphous chromium nitride/molybdenum nitride and polycrystalline Cr/Mo bilayers, 505
Containerless solidification
glass formation by containerless solidification of metallic droplets in drop tube experiments, 145
Copper
desorption of argon from amorphous $Cu_{60}Zr_{40}$ films during crystallization, 189
effect of structural relaxation on the thermodynamic properties of amorphous superconducting ZrCu alloys, 367
solid state reactions in the Cu–Zn system induced by plastic deformation at room temperature, 261
thermodynamic and kinetic aspects of crystallization of supercooled Ag–Cu liquids, 153
Crystalline alloys
magnetic properties of quasi-crystalline, amorphous and crystalline AlMn(Si) alloys, 565
mechanisms of instability in crystalline alloys with respect to vitrification, 63
Crystallization
desorption of argon from amorphous

$Cu_{60}Zr_{40}$ films during crystallization, 189
on the penetration and solution of hydrogen in amorphous $Pd_{80}Ge_{20}$ and $Pd_{80}Si_{20}$ before and after crystallization, 383
thermodynamic and kinetic aspects of crystallization of supercooled Ag–Cu liquids, 153

DNLR model
instability and relaxation of electrodeposited $Ni_{75}P_{25}$ amorphous alloys: experimental aspects quantitative theoretical predictions of isothermal and anisothermal aging using the Cunat non-linear relaxation distribution model, 359
Drop tube
glass formation by containerless solidification of metallic droplets in drop tube experiments, 145

Electrical properties
composition dependence of electrical and magnetic properties of Ni–Ag thin films, 547
Epitaxially
a metastable NiSi phase epitaxially grown on ⟨111⟩ silicon by pulsed laser quenching, 181
EXAFS
extended X-ray absorption fine structure studies of nanocrystalline materials exhibiting a new solid state structure with randomly arranged atoms, 557

Field ion microscopy
field ion microscopy and atom probing of ion-irradiated alloys, 497
Films
amorphization mechanisms in ion implanted metal films and single crystals, 89
structure and magnetism of metastable Bi–Fe alloy films, 621

Germanium
metastable phase formation with dendrite growth during laser induced rapid solidification of $Al_{59}Ge_{41}$ sputtered thin films, 209
on the penetration and solution of hydrogen in amorphous $Pd_{80}Ge_{20}$ and $Pd_{80}Si_{20}$ before and after crystallization, 383
Glass formation
glass formation by containerless solidification of metallic droplets in drop tube experiments, 145
glass formation by mechanical alloying, 233
topological instability of metallic lattices and glass formation 309
Glass-forming range
glass-forming range of transition metal –transition metal alloys prepared by mechanical alloying, 293
glass-forming ranges in transition metal–Zr alloys prepared by mechanical alloying, 283
Glasses
theoretical analysis of stress relaxation measurements by bend tests for $(Fe_{50}Ni_{50})_{1-x}B_x$ glasses: alloying effects on aging, 347

Hafnium
thermal stability of a supersaturated solution of hafnium in aluminium, 487
Hydrogen
on the penetration and solution of hydrogen in amorphous $Pd_{80}Ge_{20}$ and $Pd_{80}Si_{20}$ before and after crystallization, 383

Ion-beam mixing
ion-beam-induced atomic mixing of the metallic system Ti/Ni, 521
ion-beam mixing effects in krypton-irradiated Fe–Pd bilayers, 513
ion-beam mixing of amorphous chromium nitride/molybdenum nitride and polycrystalline Cr/Mo bilayers, 505
morphology of icosahedral Al–Fe phase produced by ion beam mixing, 445
structure of TiB_2 produced by dynamic ion mixing, 477
Ion-irradiation
field ion microscopy and atom probing of ion-irradiated alloys, 497
Iridium
thermal stability of amorphous Ta–Ir between Y–Ba–Cu–O and silicon, 217

Iron
comparison of sputtered, solid-state-reacted and melt-spun Zr–Fe alloys, 97
effect of metalloids on the passivity of amorphous Fe–Cr alloys, 581
ion beam mixing effects in krypton-irradiated Fe–Pd bilayers, 513
kinetic analysis of structural relaxation of Fe–Ni based amorphous alloys by means of DSC and electrical resistivity measurements, 375
metastability of Fe–34at.%Ni invar alloys above 600 °C, 47
morphology of icosahedral Al–Fe phase produced by ion beam mixing, 445
preparation and magnetic studies in amorphous Tb_x–Fe_{1-x}/Al_2O_3 multilayers, 613
simplified statistical model for competitive segregation kinetics — application to the Fe–6at.%Si alloy surface, 55
structure and magnetism of metastable Bi–Fe alloy films, 621
theoretical analysis of stress relaxation measurements by bend tests for $(Fe_{50}Ni_{50})_{1-x}B_x$ glasses: alloying effects on aging, 347
Irradiation
cascade effect on relative stability of ordered phases in Ni_4Mo under irradiation, 465
ion-beam mixing effects in krypton-irradiated Fe–Pd bilayers, 513
solid state amorphization reaction of Ni–Zr multilayers after irradiation with 30 MeV sulphur ions at low temperature, 115

Kinetics
kinetic analysis of structural relaxation of Fe–Ni based amorphous alloys by means of DSC and electrical resistivity measurements, 375
thermodynamic and kinetic aspects of crystallization of supercooled Ag–Cu liquids, 153

Laser alloying
microcrystalline surface layers created by laser alloying, 595
Laser quenching
a metastable NiSi phase epitaxially grown on ⟨111⟩ silicon by pulsed laser quenching, 181
laser quenching of Si–As alloy, 175
Liquid
interplay of the atomic and electronic structure in liquid and amorphous metals and alloys, 531

Magnetic properties
composition dependence of electrical and magnetic properties of Ni–Ag thin films, 547
magnetic properties of quasi-crystalline, amorphous and crystalline AlMn(Si) alloys, 565
Magnetic studies
preparation and magnetic studies in amorphous Tb_x–Fe_{1-x}/Al_2O_3 multilayers, 613
Magnetism
structure and magnetism of metastable Bi–Fe alloy films, 621
Manganese
formation by ion mixing of AlMn thin films in amorphous and quasi-crystalline phases: comparison of their electronic structure as determined by optical measurements, 429
magnetic properties of quasi-crystalline, amorphous and crystalline AlMn(Si) alloys, 565
quasi-crystalline and amorphous phases as products of the rapid solidification of $Al_{80-x}Mn_{20}Si_x$ alloys, 421
stability and thermodynamics of the icosahedral phase in rapidly solidified Al–Mn alloys ([Mn] = 6.20at.%), 411
thermal stability and phason strain relaxation in Al–Mn quasi-crystals, 437
Mechanical alloying
formation and crystallization of amorphous Ni–Ti powders prepared by mechanical alloying, 301
glass formation by mechanical alloying, 233
glass-forming range of transition metal–transition metal alloys prepared by mechanical alloying, 293
glass-forming ranges in transition metal–Zr alloys prepared by mechanical alloying, 283

mechanical alloying, interdiffusion and compaction of nickel and titanium powders, 277
Melt-Spinning
comparison of sputtered, solid-state-reacted and melt-spun Zr–Fe alloys, 97
Metallic glasses
an analysis of volume effects in metallic glass formation, 31
structural relaxation in metallic glasses, 327
Metallic lattices
topological instability of metallic lattices and glass formation, 309
Metalloids
effect of metalloids on the passivity of amorphous Fe–Cr alloys, 581
Microcrystalline alloys
microcrystalline surface layers created by laser alloying, 595
the microstructure of amorphous and microcrystalline electrodeposited Ni–P alloys, 573
Microstructure
the microstructure of amorphous and microcrystalline electrodeposited Ni–P alloys, 573
Molybdenum
cascade effect on relative stability of ordered phases in Ni_4Mo under irradiation, 465
ion beam mixing of amorphous chromium nitride/molybdenum nitride and polycrystalline Cr/Mo bilayers, 505
Multilayers
structural state of multilayers studied by X-ray absorption spectroscopy, 123

Nanocrystalline materials
extended X-ray absorption fine structure studies of nanocrystalline materials exhibiting a new solid state structure with randomly arranged atoms, 557
Nickel
a metastable NiSi phase epitaxially grown on (111) silicon by pulsed laser quenching, 181
ball milling amorphization mechanism of Ni–Zr alloys, 251
cascade effect on relative stability of ordered phases in Ni_4Mo under irradiation, 465
Composition dependence of electrical and magnetic properties of Ni–Ag thin films, 547
factors influencing heterogeneous nucleation in an Ni–Si–B glass, 167
formation and crystallization of amorphous Ni–Ti powders prepared by mechanical alloying, 301
ion-beam-induced atomic mixing of the metallic system Ti/Ni, 521
kinetic analysis of structural relaxation of Fe–Ni based amorphous alloys by means of DSC and electrical resistivity measurements, 375
mechanical alloying, interdiffusion and compaction of nickel and titanium powders, 277
metastability of Fe–34at.%Ni invar alloys above 600 °C, 47
solid state amorphization reaction of Ni–Zr multilayers after irradiation with 30 MeV sulphur ions at low temperature, 115
the microstructure of amorphous and microcrystalline electrodeposited Ni–P alloys, 573
theoretical analysis of stress relaxation measurements by bend tests for $(Fe_{50}Ni_{50})_{1-x}B_x$ glasses: alloying effects on aging, 347

Niobium
amorphization reactions in niobium-based alloys, 105
Nitride
ion beam mixing of amorphous chromium nitride/molybdenum nitride and polycrystalline Cr/Mo bilayers, 505
Nucleation
factors influencing heterogeneous nucleation in an Ni–Si–B glass, 167

Palladium
investigation on the amorphization of Zr–Pd alloys by ball milling, 271
ion beam mixing effects in krypton-irradiated Fe–Pd bilayers, 513
on the penetration and solution of hydrogen in amorphous $Pd_{80}Ge_{20}$ and $Pd_{80}Si_{20}$ before and after crystallization, 383
Permanent magnets
metastable ferromagnetic materials for permanent magnets, 601

Phase diagrams
alloy phase diagrams and energy deposition: something old and something new, 451
Phason strain relaxation
thermal stability and phason strain relaxation in Al–Mn quasi-crystals, 437
Phosphorus
enhanced equilibrium concentration of donors in antimony-, arsenic- or phosphorus-doped silicon on sapphire, 39
the microstructure of amorphous and microcrystalline electrodeposited Ni–P alloys, 573
Plastic deformation
solid state reactions in the Cu–Zn system induced by plastic deformation at room temperature, 261

Quasi-crystals
formation by ion mixing of AlMn thin films in amorphous and quasi-crystalline phases: comparison of their electronic structure as determined by optical measurements, 429
magnetic properties of quasi-crystalline, amorphous and crystalline AlMn(Si) alloys, 565
quasi-crystalline and amorphous phases as products of the rapid solidification of $Al_{80-x}Mn_{20}Si_x$ alloys, 421
structural relationships between the quasi-crystalline and the amorphous state in alloys, 395
thermal stability and phason strain relaxation in Al–Mn quasi-crystals, 437
Quenching
dynamical properties of high pressure quenched f.c.c. Al–Si solid solutions, 223

Rapid solidification
metastable phase formation with dendrite growth during laser induced rapid solidification of $Al_{59}Ge_{41}$ sputtered thin films, 209
quasi-crystalline and amorphous-phases as products of the rapid solidification of $Al_{80-x}Mn_{20}Si_x$ alloys, 421
stability and thermodynamics of the icosahedral phase in rapidly solidified Al–Mn alloys ([Mn] = 6.20at.%), 411

Sapphire
enhanced equilibrium concentration of donors in antimony-, arsenic- or phosphorus-doped silicon on sapphire, 39
Silicon
a metastable NiSi phase epitaxially grown on ⟨111⟩ silicon by pulsed laser quenching, 181
dynamical properties of high pressure quenched f.c.c. Al–Si solid solutions, 223
enhanced equilibrium concentration of donors in antimony-, arsenic- or phosphorus-doped silicon on sapphire, 39
factors influencing heterogeneous nucleation in an Ni–Si–B glass, 167
influence of the annealing atmosphere on the chemical and thermal stability of amorphous WSi_2, 197
laser quenching of Si–As alloy, 175
on the penetration and solution of hydrogen in amorphous $Pd_{80}Ge_{20}$ and $Pd_{80}Si_{20}$ before and after crystallization, 383
quasi-crystalline and amorphous phases as products of the rapid solidification of $Al_{80-x}Mn_{20}Si_x$ alloys, 421
simplified statistical model for competitive segregation kinetics — application to the Fe–6at.%Si alloy surface, 55
thermal stability of amorphous Ta–Ir between Y–Ba–Cu–O and silicon, 217
Silver
composition dependence of electrical and magnetic properties of Ni–Ag thin films, 547
thermodynamic and kinetic aspects of crystallization of supercooled Ag–Cu liquids, 153
Solid state reactions
comparison of sputtered, solid-state-reacted and melt-spun Zr–Fe alloys, 97
solid state reactions in the Cu–Zn system induced by plastic deformation at room temperature, 261

Sputtering
comparison of sputtered, solid-state-reacted and melt-spun Zr–Fe alloys, 97
Stability
influence of the annealing atmosphere on the chemical and thermal stability of amorphous WSi_2, 197
Statistical model
simplified statistical model for competitive segregation kinetics — application to the Fe–6at.%Si alloy surface, 55
Stress
theoretical analysis of stress relaxation measurements by bend tests for $(Fe_{50}Ni_{50})_{1-x}B_x$ glasses: alloying effects on aging, 347
Structural relaxation
effect of structural relaxation on the thermodynamic properties of amorphous superconducting ZrCu alloys, 367
kinetic analysis of structural relaxation of Fe–Ni based amorphous alloys by means of DSC and electrical resistivity measurements, 375
structural relaxation in metallic glasses, 327
structural relaxation in some amorphous alloys, 339
Structure
interplay of the atomic and electronic structure in liquid and amorphous metals and alloys, 531
Sulphur
solid state amorphization reaction of Ni–Zr multilayers after irradiation with 30 MeV sulphur ions at low temperature, 115
Superconductivity
effect of structural relaxation on the thermodynamic properties of amorphous superconducting ZrCu alloys, 367
thermal stability of amorphous Ta–Ir between Y–Ba–Cu–O and silicon, 217
Supercooled
thermodynamic and kinetic aspects of crystallization of supercooled Ag–Cu liquids, 153

Tantalum
thermal stability of amorphous Ta–Ir between Y–Ba–Cu–O and silicon, 217
Terbium
preparation and magnetic studies in amorphous Tb_x–Fe_{1-x}/Al_2O_3 multilayers, 613
Thermodynamics
effect of structural relaxation on the thermodynamic properties of amorphous superconducting ZrCu alloys, 367
stability and thermodynamics of the icosahedral phase in rapidly solidified Al–Mn alloys ([Mn] = 6.20at.%), 411
thermodynamic and kinetic aspects of crystallization of supercooled Ag–Cu liquids, 153
thermodynamics of undercooled liquids, 131
Thin films
composition dependence of electrical and magnetic properties of Ni–Ag thin films, 547
formation by ion mixing of AlMn thin films in amorphous and quasi-crystalline phases: comparison of their electronic structure as determined by optical measurements, 429
metastable phase formation with dendrite growth during laser induced rapid solidification of $Al_{59}Ge_{41}$ sputtered thin films, 209
Titanium
formation and crystallization of amorphous Ni–Ti powders prepared by mechanical alloying, 301
ion-beam-induced atomic mixing of the metallic system Ti/Ni, 521
mechanical alloying, interdiffusion and compaction of nickel and titanium powders, 277
structure of TiB_2 produced by dynamic ion mixing, 477
Topological instability
topological instability of metallic lattices and glass formation, 309
Transition metals
glass-forming range of transition metal –transition metal alloys prepared by mechanical alloying, 293
glass-forming ranges in transition metal–Zr alloys prepared by mechanical alloying, 283

Tungsten
influence of the annealing atmosphere on the chemical and thermal stability of amorphous WSi_2, 197

Undercooled liquids
thermodynamics of undercooled liquids, 131

Vitrification
mechanisms of instability in crystalline alloys with respect to vitrification, 63
the process of spontaneous vitrification evaluated by calorimetry, 81
Volume effects
an analysis of volume effects in metallic glass formation, 31

X-ray absorption spectroscopy
structural state of multilayers studied by X-ray absorption spectroscopy, 123

Zinc
effect of structural relaxation on the thermodynamic properties of amorphous superconducting ZrCu alloys, 367
solid state reactions in the Cu–Zn system induced by plastic deformation at room temperature, 261
Zirconium
ball milling amorphization mechanism of Ni–Zr alloys, 251
comparison of sputtered, solid-state-reacted and melt-spun Zr–Fe alloys, 97
desorption of argon from amorphous $Cu_{60}Zr_{40}$ films during crystallization, 189
glass-forming ranges in transition metal–Zr alloys prepared by mechanical alloying, 283
investigation on the amorphization of Zr–Pd alloys by ball milling, 271
solid state amorphization reaction of Ni–Zr multilayers after irradiation with 30 MeV sulphur ions at low temperature, 115
